EDUCATION

2016-2018
POLITECNICO DI MILANO

- Master of Science, Computer Science and Engineering
- 110/110 Cum Laude

2016-2018
TUM MUNICH

- Erasmus Exchange Program

2013-2016
POLITECNICO DI MILANO

- Bachelor of Science, Computer Science and Engineering
- 110/110 Cum Laude

INTERESTS

- Long-distance runner - several marathon under 3 hours
- Clarinetist in a small band

LANGUAGES

- English (Fluent)
- Italian (Mother tongue)
- German (Basics)

PROFILE

Senior Software Engineer at Vuforia, PTC, with a profound passion for Augmented Reality (AR) and Computer Vision (CV). Demonstrating extensive expertise in KPI design, test frameworks, and cloud infrastructure, I am committed to delivering exceptional AR experiences on mobile platforms. My academic journey includes a Master's degree with honors in Computer Science and Engineering from Politecnico di Milano, where my research focused on CV applications.

WORK EXPERIENCE

Senior Software Developer - Vuforia, PTC — 2023 - PRESENT

- Contribution to Cloud team:
  - extensions of 3 RESTful APIs in Python (FastAPI), Typescript (NestJs) and Scala.
  - improvements to AWS infrastructure and various improvements to maintain and deploy the APIs smoothly (Prometheus, Graphana, PagerDuty, Argo, FluxCD, Helm).
- Porting of CI from TeamCity to GitHub Action.

AWS, KUBERNETES, , TEAMCITY, GITHUB ACTIONS, FASTAPI, SCALA, TYPESCRIPT

Software Developer - Vuforia, PTC — 2019 - 2023

- Design and implementation of several components of the benchmarking test framework written in Python.
- Extensions of the Vuforia SDK written in C++.
- Migration of the benchmarking tests to Azure.
- Improvement to the pipelines for automatic ground-truth generation.

PYTHON, C++, AZURE, DOCKER

Thesis with Politecnico di Milano and Piaggio — 2018

- Design and implementation of a CV-based collision avoidance system for motorbikes. The most innovative contribution was the adaptation of the car-oriented algorithms on motorbikes and a novel approach to identify stop lights regions and determine their status.

BMW - TUM Mobility Services Project — 2017

- Design and implementation of FleetMe, a tool that optimizes management of corporate fleets by using car data.

PRIZES

- Winner of the scholarship "Le migliori matricole dell'A.A. 2013/2014" for best first year students
- Scholarship for best High School Students from Lions Club Valle Brembana 2012-2013
